Message from Bangladesh Cardiac Society

We mourn

We salute our colleague, Dr. Md Moyeen Uddin, who embraced a hero's death in serving the cause of humanity.

Dr. Moyeen was a brilliant promising physician who graduated from Dhaka Medical College in 1998. Later he did his FCPS (Medicine) and MD (cardiology) from Dhaka Medical College, Dhaka.

He was posted as the Assistant Professor at Sylhet Osmani Medical College. In the wave of epidemic of COVID-19, he was infected in the early April. He was transferred by road to Dhaka when his condition deteriorated. He was under treatment at Kurmitola General Hospital and passed away on 15th April. (Inna lillahi wa inna ilayhi raji'un) early morning. He left behind his wife and 2 children.

Bangladesh Cardiac Society expressed its deep respect for the departed soul and pray to Allah so that his soul be in the eternal peace. Our heartfelt sympathy is to his family.

We expect his family will get the full support from the government. Our Society pledges its support to his family.

His death re-emphasised the need of proper protection of the front-line health care providers – doctors, nurses, technicians as they are working at high risk. The country cannot afford to lose such trained personnel at this critical period when their services are needed more than any other time.

Prof. A K M Mohibullah
President
Bangladesh Cardiac Society

Prof. Abdullah Al Shafi Majumder
Secretary General
Bangladesh Cardiac Society
